Practical. Preferred. Plastic.

Lenox™ Lockers

Metal doesn't stand a chance. Quick installation and low maintenance costs can add up to a 50% life cycle cost savings with Lenox Lockers. Plus this fully-assembled product is backed by a 20-year warranty and made from 30% post-industrial recycled content. Lenox Lockers are the preferred specification in locker rooms all over the country. In terms of durability, versatility and product life, metal lockers fall far short of this solid plastic solution.

"The low maintenance, durability and no-rust factor make Lenox the #1 choice in lockers, especially in wet room areas. We highly recommend these lockers for any institution."

- Director of Residential Life-Facilities
Illinois State University

"Because of the unique layout and conditions of our facility, we needed a product that was very strong and durable. The lockers have complemented our atmosphere and withstood the high usage we encounter year-round."

- Water Park Manager, Outdoor World

"Lenox Lockers have enhanced our school appearance and have provided a solution for our students' storage needs. In addition, they look as new as the day they were installed – evidence of their durability in a high school setting!"

- Director of Instruction
Scranton State School for the Deaf

Lenox Lockers vs. Metal Lockers

Plastic lockers may require an additional investment up front, but savings on repairs and maintenance will make up the difference over the 20-year life of the locker.

Locker Type	Painting (4 times)	Door Replacment (2 times)	Total (100 Lockers)
Metal Locker	\$100 (per locker)	\$110 (per locker)	\$21,000
Plastic Locker	\$0 (per locker)	\$0 (per locker)	

Maintaining 100 metal lockers for 20 years with 4 paint jobs and 2 door replacements per locker would cost \$21,000.

* Also available in 100% Post-Consumer recycled content. Co-Extruded colors are available at an additional charge.

** Also available in 100% Post-Industrial recycled content.

Due to printing variances, the actual color of material may differ. Material samples are available by contacting your local Bradley Representative.

“Our maintenance department is very pleased that the lockers cannot be kicked shut, which usually results in many broken locker latches. They also appreciate the ease with which the locker surfaces can be cleaned.”

-School Superintendent
Westchester Public Schools

Resilient for the long haul

Unlike metal, Lenox Lockers are constructed from corrosion-proof high-density polyethylene material that won't rust or dent. Plastic lockers are also more resistant to scratches and easier to repair than metal lockers.

Forget about maintenance

With Lenox, you'll never paint a locker again. You get maintenance-free lockers that still look new after years of use. Even spray paint and magic markers are easily removed with standard cleaning products.

The unrivaled 20-year promise

No other locker supplier can beat the Lenox guarantee. All plastic locker parts and components carry a 20-year warranty against rust, corrosion, denting and delaminating under normal use.

100% Post Consumer Recycled Material

Lenox Lockers are now available in 100% post-consumer recycled material. Four colors are offered in the new material made completely from recycled milk jugs. On average, each locker keeps more than 500 milk jugs out of landfills. This material provides the same performance requirements as the current plastic - no rust, no dents, no delamination - and the same 20-year warranty. (see color chart for available colors)

“On average, each locker keeps more than 500 milk jugs out of landfills.”

Cubby Lockers

The easy access cubby locker is perfect for items that do not require locked storage. The durable cubby is shipped fully assembled and can reduce installation costs by up to 50 percent. (3 cubby lockers pictured)

Z - Lockers

The new Z-Locker design provides practical multi-storage for overcoats, suits, dresses and other hanging articles without wasting valuable floor space. Perfect for Health clubs, YMCAs, Spas, Aquatic centers and Fitness Centers.

Pedestal Bench

Locker room benches complete the long line of solid plastic products for your restroom and locker room applications. Benches are 1 1/2" high-density polyethylene (HDPE) and are available in 16 of our standard colors. Black anodized aluminum pedestal, 18 1/2" ADA compliant height.

Bench Lockers

Convenient seating in the locker room with added secure storage underneath with Lenox bench lockers. The doors are attached to the frames with a full-length heavy-duty stainless steel hinge powder coated to match the locker color.

One piece construction reduces installation cost

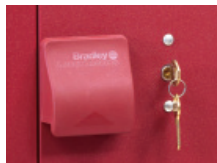

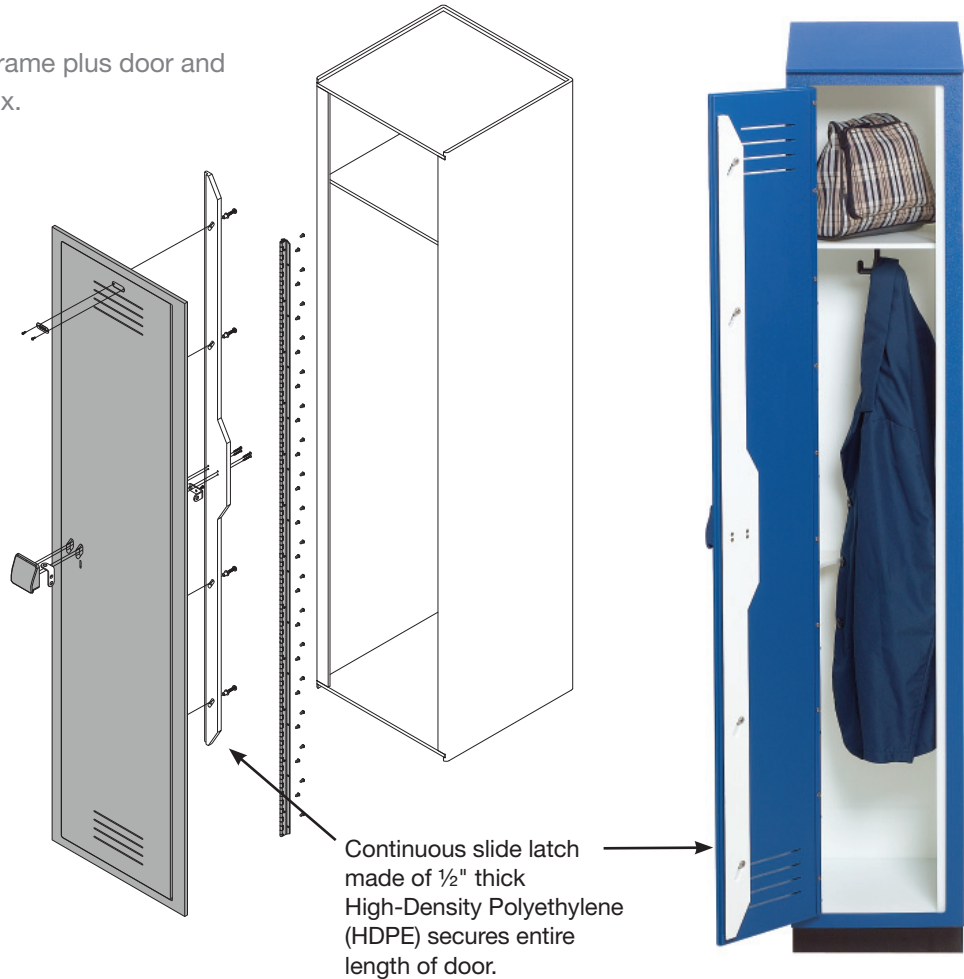

Formed by a polymer resin, Lenox components are one solid piece—no edges to come apart, no core to delaminate and no exposed fasteners. With a box panel thickness of 3/8" and door and frame thickness of 1/2", Lenox Lockers withstand impacts that would easily damage metal lockers. The durable, wrap-around box design is shipped fully assembled, so there's no added time or expense required to piece together countless components.

Exclusive Features

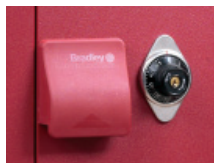

- Continuous slide latch runs the entire length of the door.
- Heavy-duty stainless steel piano hinge is more durable than aluminum or plastic.
- Ergonomically-designed handle with concealed metal hasp.
- Top and bottom are welded to frame plus door and frame assembly is welded to box.
